To whom it may concern,

I had the pleasure of having Annie Li as our intern for the HPE 2025 Internship Program. During my relationship with Annie, I was greatly surprised by the dedication, motivation, and excellent attitude when carrying out the assignments given to her. I would like to highlight the following:

**Technical Skills:**

Annie showed deep understanding of the Electrical Engineering concepts and skills required by the Internship program in our group. Annie was also very interested in acquiring knowledge in different areas of the Hardware Design. She was not hesitant to learn about Project schematics, Layout, data sheet reviews, Testing and even learning some advanced rework technics.

**Leadership:**

I was surprised of how Annie took the initiative to contact Manufacturing vendors in the research of the datasheets and background information required by the project. In her role, she demonstrated great collaboration and excellent communication skills with the different groups engaged in the project development.

**Execution:**

Annie was a great team player, always acting very polite, respectful, and with Professional attitude in the preparation, development, and excellent presentation of the assigned project to multiple teams.

I am convinced that Annie will be a great fit for any research program or project where she wants to engage.
